### EE 210 Introduction to Economics

*“The course examines main aspects of American economic system such as corporate power, employment, labor relations, agriculture, the role of Federal government.”*

**Course objectives:** *This course is designed to give a basic overview of Economics to non-economists. The first half of the course will be devoted primarily to economic intuition, and micro economic issues. The second half will continue the microeconomic work, as well as to introduce students to the basics of Macroeconomic theory.*

*By the end of the course, students should be familiar with the basics of micro-economics, including Supply and Demand, Elasticities, Rationality, Consumer choice, Public economics, Public Goods, Externalities, Government Funding and Taxation, Market Power and Market Distortion. Additionally, students should be familiar with the basic language of Macro-Economics, including GDP, Inflation, and the trade-off between the two, Unemployment, Long Term Economic Growth, and Cyclical Fluctuations.*

### Required Text:

Principles of Economics (for use in Asia Only) Seventh Edition  
N. Gregory Mankiw

Principles of Microeconomics (International Edition) Sixth Edition  
N. Gregory Mankiw (only two chapters)

**Other Readings:** Various other readings (contemporary articles, mostly) may be assigned, those articles will be posted to my website.

### Cheating:

Don't. If you do, and I catch you, you will be reported to the program director for

appropriate punishment. At a minimum, you will receive a zero on the assignment you are caught cheating on, other punishments include automatically failing the course, and being suspended for one (or more) semesters.

### **Evaluation:**

The class evaluations will be based on two exams, a midterm and a final. The midterm will be 2 hours in length, the final will be 3 hours in length. Students will have a choice of what questions to answer. A sample exam will be passed out before the first exam.

Each exam is worth a percentage of your grade as given below. The Midterm exam will cover material from the first half of class, the Final exam will be comprehensive, though weighted towards materials studied in the second half of the semester. The exam schedule is given below:

Midterm Exam: 40%

Final Exam: 60%

### **Class Notes:**

All lecture notes for this class are available online, at <http://www.ajarnkennedy.com>

Follow the links from the frontpage. Students are encouraged to print out the notes ahead of time, and to bring them to class with them. I will provide the first set of notes to students on the first day of class, it is the student's responsibility to print them out subsequently if they want a copy of them to follow during class.

I generally DO NOT use PowerPoint, or much any other multi-media, just a whiteboard and my voice. The notes are not a substitute for the lectures; they are a supplement to them. I use them to guide my lecture, and to remind myself of my structure and the points I want to make, but they do not explain the material themselves.

### **Important Dates:**

Classes Begin	15 August 2016
Adding and Dropping Courses	XXXXXXXX
Midterm Exam	2 Oct, 9:00 – 12:00
Course Withdrawal with “W”	XXXXXXXX
